The code seems to work fine for small amounts of instances, but when I generate more the application crashes. I can't figure out why this is. This is just the start of my code, it is similar to what I am doing in real code, but I've left out a bit to make it more simple. public class Point { public float x, y; public Point(float x, float y) { this.x = x; this.y = y; } } public class Encoder { private Point[] coordinates; public void Initialize(int dimensions) { coordinates = new Point[dimensions * 5]; } } This is where it starts to get the issue. public class Game { public void Update() { Encoder encoder = new Encoder(); for (int i = 0; i
